

EDI-Assistant Software

- EDI-Assistant Software, What exactly is it ??
- This software works as an add on to your current EDI solution. It has the ability to capture inbound and outbound data and **give you many additional features** that your current solution does not. It will not interfere or change the way you are currently processing your EDI. It is a system where you can be on top of your EDI without having to be a computer expert. EDI is the lifeblood of a business today and too many companies do not manage their EDI properly. Poor EDI management can lead to loss of orders, chargeback's and even loss of customers.

EDI-Assistant Software

Q:Where does EDI-Assistant get it's information from ?

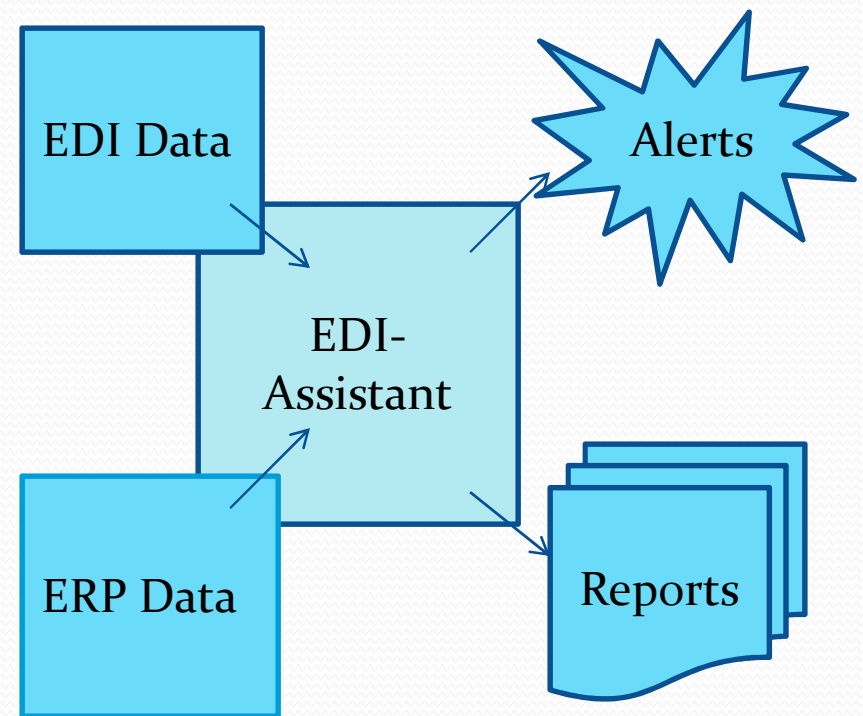

A: From systems you already have .

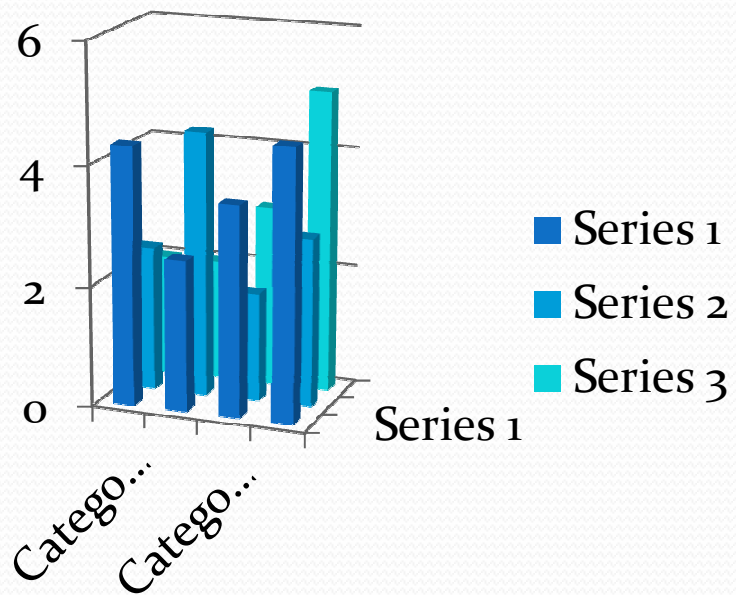

EDI-Assistant Software

Q:What does EDI-Assistant do with the information it gathers?

A: It sends Reports and Alerts direct to the users.

EDI-Assistant Software

View or Graph customer data in various formats and reports

EDI-Assistant Software
